The Company proposes not to transfer any funds to the General Reserve for the Financial Year 2024-2025.

Future Outlook:

The plastic compounding market is valued at USD 82.0 Billion in 2025 and is expected to reach USD 182.0 Billion by 2035, advancing at an 8.3% Compound Annual Growth Rate ("CAGR") throughout the forecast period. Within the plastic compounding market, the United States remains the most lucrative country in 2025 thanks to entrenched automotive and packaging clusters. Meanwhile, China is poised to be the fastest-growing national market from 2025 to 2035 as EV assembly plants; appliance production and infrastructure spending keep resin demand surging. Across industries, regulatory pushes for vehicle light-weighting, single-use-plastic curbs and net-zero commitments are reshaping the plastic compounding market. Feed-stock volatility and the steep capex of advanced recycling restrain smaller converters but automation and AI-driven inline quality controls are lifting yields and compressing scrap rates. Key trends steering the plastic compounding market include graphene-enhanced conductivity packs and regionalised

toll-compounding hubs that slash logistics emissions. Looking ahead, the plastic compounding market is set to pivot toward mass-customised, circular-ready polymers. By 2030, chemical-recycling inputs are forecast to cover 15% of global compound tonnage, while digital product passports will trace every pellet's carbon intensity. Compounding firms that embed closed-loop take-back, deploy green-hydrogen-fed extrusion lines and co-develop drop-in resins with 3D-printing bureaus will capture outsized share through 2035. India's wires and cables market has also expanded significantly from Rs 859 Billion in Financial Year 2019 to Rs 1,702 Billion in Financial Year 2024, registering a CAGR of 14.7% during this period. Furthermore, the sector is projected to grow at a CAGR of 11-13% between Financial Year 2024 and Financial Year 2029. The significant share of power transmission cables can be attributed to favourable government initiatives in the power sector, such as railway electrification projects and rural electrification schemes. Additionally, rising expenditures in the construction sector and the expansion of the Fast-Moving Electrical Goods industry are driving the demand for building wires.

MANAGEMENT DISCUSSION AND ANALYSIS REPORT**World Economic Overview:**

Plastic has become an integral part of our daily lives, from the packaging of products we consume to the materials used in construction, automobiles and electronics. The global plastic manufacturing industry has witnessed a significant growth in recent years, driven by factors such as the increasing demand for plastic products, technological advancements in plastic manufacturing and the adoption of sustainable practices. To address environmental concerns related to plastic waste, the industry is exploring sustainable practices such as recycling, the use of bioplastics made from renewable resources and the adoption of circular economy models. Digitalization and Industry technologies are also expected to play a significant role in improving efficiency and reducing costs in the industry. Overall, the plastic manufacturing industry is expected to continue growing, driven by increasing demand from emerging economies and the adoption of sustainable practices. Companies in the industry must stay up-to-date with the latest trends and regulations and adopt sustainable practices to succeed in the long term. However, the industry also faces challenges such as environmental concerns related to plastic waste, regulations on plastic usage and fluctuations in raw material prices. To navigate these challenges and tap into the opportunities presented by the industry, businesses need to keep a pulse on the latest trends and forecasts.

Indian Economic Overview:

India's plastic industry is expected to grow in the coming years as the demand for plastic products in packaging, automotive and construction, consumer goods and other sectors continues to grow. Technological developments and a growing emphasis on sustainability through the development of environmentally friendly plastics are also contributing to the industry's growth. Government initiatives promoting manufacturing and a growing middle class are further contributing to the growth of plastic consumption in India. The Indian plastics industry produces a wide range of products, such as plastic and linoleum, houseware products, cordage, fishnets and floor coverings. It also creates medical items, packaging items, plastic films, pipes and raw materials, among others. The country mainly exports plastic raw materials, films, sheets, woven sacks, fabrics, tarpaulin etc. The Government of India intends to take the plastic industry from a current level of Rs. 3,00,000 crore (US\$ 37.8 Billion) of economic activity to Rs. 10,00,000 crore (US\$ 126 Billion) in four-five years.

Industry Overview:

The Indian plastic industry is one of the leading sectors in the country's economy. The history of the plastic industry in India dates to 1957 with the production of polystyrene. Since then, the industry has made substantial progress and has grown rapidly. The industry is present across the country and has more than 2,500 exporters. It employs more than 4 million people in the country and constitutes 30,000 processing units; among these, 85-90% belong to small and medium enterprises. India manufactures various products such as plastics and linoleum, houseware products, cordage, fishnets, floor coverings, medical items, packaging items, plastic films, pipes, raw materials etc. The country majorly exports plastic raw materials, films, sheets, woven sacks, fabrics and tarpaulin.

Future Outlook:

The plastic compounding market is valued at USD 82.0 Billion in 2025 and is expected to reach USD 182.0 Billion by 2035, advancing at an 8.3% Compound Annual Growth Rate (“CAGR”) throughout the forecast period. Within the plastic compounding market, the United States remains the most lucrative country in 2025 thanks to entrenched automotive and packaging clusters. Meanwhile, China is poised to be the fastest-growing national market from 2025 to 2035 as EV assembly plants; appliance production and infrastructure spending keep resin demand surging. Across industries, regulatory pushes for vehicle light-weighting, single-use-plastic curbs and net-zero commitments are reshaping the plastic compounding market. Feed-stock volatility and the steep capex of advanced recycling restrain smaller converters but automation and AI-driven inline quality controls are lifting yields and compressing scrap rates. Key trends steering the plastic compounding market include graphene-enhanced conductivity packs and regionalised toll-compounding hubs that slash logistics emissions. Looking ahead, the plastic compounding market is set to pivot toward mass-customised, circular-ready polymers. By 2030, chemical-recycling inputs are forecast to cover 15% of global compound tonnage, while digital product passports will trace every pellet’s carbon intensity. Compounding firms that embed closed-loop take-back, deploy green-hydrogen-fed extrusion lines and co-develop drop-in resins with 3D-printing bureaus will capture outsized share through 2035. India’s wires and cables market has also expanded significantly from Rs 859 Billion in Financial Year 2019 to Rs 1,702 Billion in Financial Year 2024, registering a CAGR of 14.7% during this period. Furthermore, the sector is projected to grow at a CAGR of 11-13% between Financial Year 2024 and Financial Year 2029. The significant share of power transmission cables can be attributed to favourable government initiatives in the power sector, such as railway electrification projects and rural electrification schemes. Additionally, rising expenditures in the construction sector and the expansion of the Fast-Moving Electrical Goods industry are driving the demand for building wires.

Challenges in the Plastic Industry:

The plastic industry faces several challenges that require attention and strategic planning to ensure sustainable growth and mitigate potential risks. Two significant challenges include environmental impact and pollution as well as health and safety concerns.

- **Environmental Impact and Pollution:** The production and use of plastics have a significant impact on the environment. The plastic industry heavily relies on fossil fuels and the continued growth of

the industry is projected to increase plastic production by 40% over the next decade, as reported by the Center for Biological Diversity. This increase in plastic production can lead to environmental pollution, particularly in neighborhoods and waterways.

- **Health and Safety Concerns:** The plastic industry also faces health and safety concerns, both for workers in the industry and the communities surrounding plastic production facilities. The emissions from plastic production facilities, as mentioned earlier, can contribute to various health issues such as asthma, lung cancer and cardiovascular diseases in neighboring communities as reported by Center for Biological Diversity.

Opportunity and Threats:

Opportunity:

- The use of plastic made products has gained considerable response from the customers. In number of items of Retail and Industrial consumption, it is found that the use of plastic made products has replaced many other products as the best substitute products. The increase in the use of plastic products will open new areas for the plastic Industries.
- Polymers are the foundation of plastic and are used in a wide variety of applications, including packaging, automotive, construction, electronics, medical etc.
- Plastics exhibit a number of useful characteristics ideal for wire insulation, including ductility, electrical resistance, UV resistance and fire resistance and therefore find use in cable and wire industry.
- Plastics used in Automotive Industries are required to be lightweight, so as to reduce fuel consumption.
- The use of 3D printing technology in plastic manufacturing is on the rise, allowing manufacturers to produce complex plastic parts with greater precision and customization. This technology is expected to revolutionize the manufacturing industry and create new opportunities for plastic manufacturers.
- The circular economy is an emerging concept that aims to minimize waste and promote sustainability by reusing and recycling materials. Plastic manufacturers are increasingly adopting this concept, with many companies investing in recycling facilities and producing more sustainable plastic products.
- Government of India has launched many initiatives like Make in India, Atmanirbhar Bharat Abhiyaan for making the country and its citizens independent and self-reliant in all senses. This will have a positive effect on the growth of many industries.

Threat:

- One of the major factors that are expected to restrain the growth of the plastic compounding market is the fluctuating raw material prices. Therefore, this is expected to hinder the growth of the plastics compounding market.
- There has been the imposition of various stringent regulations on the use of plastic with rising environmental concerns related to the toxicity issues and this will pose a major challenge to the growth of the global plastic compounding market.
- Possible restraints for the plastic compounding market include increasing concerns about environment pollution and the need for sustainable solutions. Stringent regulations on single-use plastics, recycling challenges and a shift towards biodegradable alternatives may limit the growth of traditional plastic compounds.
- The fluctuating raw material prices and supply chain disruptions could impact the industry's profitability. The rise of alternative materials like bio-based polymers and the growing preference for recycled plastics might pose a competitive challenge. Furthermore, global economic uncertainties

and geopolitical factors could influence investment decisions and hinder market expansion for plastic compounding.

- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances. Under Section 143(3)(i) of the Act, we are also responsible for expressing our opinion on whether the Company has adequate internal financial controls with reference to financial statements in place and the operating effectiveness of such controls.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the standalone financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the standalone financial statements, including the disclosures and whether the standalone financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the standalone Ind AS financial statements for the financial year ended March 31, 2025 and are therefore the key audit matters. We describe these matters in our auditor's

report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

Report on the Internal Financial Controls under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 (“the Act”)

We have audited the internal financial controls with reference to financial statements of **M/S KKALPANA PLASTICK LIMITED** (“the Company”) as of March 31, 2025 in conjunction with our audit of the standalone financial statements of the Company for the year ended on that date.

Management’s Responsibility for Internal Financial Controls

The Company’s management is responsible for establishing and maintaining internal financial controls based on “the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls over Financial Reporting issued by the Institute of Chartered Accountants of India”. These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to company’s policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

Auditors’ Responsibility

Our responsibility is to express an opinion on the Company’s internal financial controls over financial reporting based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls over Financial Reporting (the “Guidance Note”) and the Standards on Auditing, issued by ICAI and deemed to be prescribed under section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls, both applicable to an audit of Internal Financial Controls and, both issued by the Institute of Chartered Accountants of India. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor’s judgement, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company’s internal financial controls system over financial reporting.

Meaning of Internal Financial Controls Over Financial Reporting

A company’s internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company’s internal financial control over financial reporting includes those policies and procedures that:

- (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company;

- (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles and that receipts and expenditures of the company are being made only in accordance with authorisations of management and directors of the company; and
- (3) provide reasonable assurance regarding prevention or timely detection of un authorised acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls Over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion, the Company has, in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at March 31, 2025, based on, "the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India".
